Orange Clinic-Tattoo Removal

In this digital age, different people have different reasons for getting tattoos, but once you decide that you no longer want yours, it can be an uphill battle removing them.

Don't panic! If you are looking for **tattoo removal in chennai,** try Orange Clinic's Picosecond Laser procedure for having it removed with minimal cost and downtime.

Permanent Tattoo Removal in Chennai - Picosecond Laser

Picosecond laser is a non-surgical laser skin treatment to remove a tattoo or another form of permanent body art from the chest, face, hands, and more.

How it works?

- Picosecond laser device is placed on the tattooed skin.
- Targets pigment molecules in the ink using a thin beam of light.
- Allowing the body to naturally clear away the destroyed tissue.

Laser Sessions Requirements:

A person usually requires 3-5 laser sessions to successfully remove a tattoo once they have received approval for treatment. The number of sessions required for tattoo removal depends on various factors like:

- Colour and quality of the ink
- Skin type
- Location and size of the tattoo

Benefits of Pico Second Laser Tattoo Removal:
- Faster healing
- Gentle on the skin
- Surrounding tissues are not affected
- Does not remove healthy tissue
